

**Vane wheel probe ZS25 for flow measurement of gases and liquids with integrated, configurable transducer UFA in Ex-d housing**

Vane wheel probe ZS25  
(Dimensions see Page 3)

**Measurable variables**

- actual flow velocity  $v$  [m/s] in air/gases
- (actual) flow rate [ $m^3/h$ ] in air/gases and water/liquids
- conversion to standard velocity/standard volume flow by entering working pressure and temperature parameters

**Measuring range**

- 0.3 ... 120 m/s air/gases
- 0.03 ... 10 m/s water/liquids

**Functional principle**

- vane wheel flow sensor
- sensing the vane rotation; non-contact by means of inductive proximity switch

**Medium**

- air, gas mixtures and clean gases
- water, liquids with viscosities of up to 200 cSt

**Design**

- insertion probe with Ex-d housing

**Examples of application**

- flow measurement e.g. of air, exhaust gas, process gas
- in processes with varying and/or unknown gas compositions
- flow monitoring in pharmaceutical installations
- monitoring inertisation processes
- measurement of flammable liquids
- measuring in non-conducting liquids such as ultra pure water, for example in the semiconductor industry

**Advantages**

- accurate measured values even in varying and/or unknown gas compositions

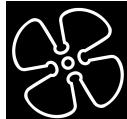

- compact design with optional on-site display in Ex-application
- application in category 1 (zones 0 and 20), transducer housing approved for Category 2 (zones 1 and 21)
- no external isolation/supply unit necessary

**Humidity in the sample gas**

- relative gas humidity of less than 100 % has no impact on the measurement uncertainty

**Particles in the medium**

- can cause restriction in the fatigue strength of the vane wheel set

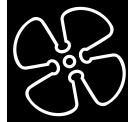

**Model designation (example)**

Measurement uncertainty	for air/gases and water : < 1.5 % of measured value + 0.5 % of terminal value
Repeatability	for air/gases and water : ±(0.05 % of terminal value + 0.02 m/s)

\* with an air/gas density of approx. 1.2 kg/m<sup>3</sup>

\*\* the specified measuring range for application in liquids is usable provided that cavitation does not arise around the vane wheel.

#### Ex-d transducer housing

Dimensions	outside diameter/length/height: approx. 110/205/182 mm
Material	die-cast aluminium max. 0.5 % Mg, coated housing
Type of protection	IP68, IEC 529 and EN 60 529
Connection	bush for shielded cables with outside diameter 5 ... 9 mm, contacting of the overall shielding on the earth terminal in the housing; connection via screw-type terminals Ex-e for wires with cross-section 0.14 – 1.5 mm <sup>2</sup>
Alignment to the sensor	connection housing rotatable by approx. 350 ° and lockable
Set up	dual chamber system, consisting of 1) electronics in Ex-d protection (pressure-resistant casing) and 2) connection area in Ex-e protection (increased safety) with terminal block and bush

#### Electromagnetic Compatibility (EMC)

according to EN 61 000-6-2 / IEC77

#### Mounting attitude

any

#### Transducer UFA, integrated in the connection housing

Analog output flow	4 ... 20 mA working resistance max. 500 Ohm, with HART® modem adapter: resistance min. 250 Ohm, max. 500 Ohm
Output limit value or quantity pulse	potential-free relay contact (normally open contact), max. 300 mA / 27 VDC
Communication port	HART®, via modem adapter for PC connection and PC software UCOM (see Accessories)
Self-monitoring	output signals are electrically isolated from the power supply
Power supply	parameter settings, sensor interface; in the case of error: analog output less than 3.6 mA
Power consumption	24 V DC (20 ... 27 V DC)
Setting parameter (selection depending on parameter set)	less than 5 W analog output, time constant, profile factor, tube inside diameter, limit value or quantity pulse (quality rating adjustable), switch-over actual/standard flow with setting parameters 'working pressure' and 'working temperature'

**Accessories (optional)**

	Description	Article No.
LCD display	1st line: 'instantaneous value': flow rate or flow velocity 2nd line: 'counter' or 'error code'; 2 x 16-digit, character height 5.5 mm, working temperature range -20 ... +50 °C display rotatable in 90 °-stages on removing the window of the Ex-d housing	HB10-b520
Calibration certificate v/FA	6 standard calibration values, (see Data Sheet U183)	kibneu
HART® modem adapter	for changing the setting parameter, for PC-USB connection	HB10-b101
PC software UCOM	for configuring the transducer via RS232	HB10-b052

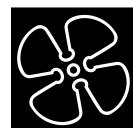

Ex-d transducer housing with optional LCD display

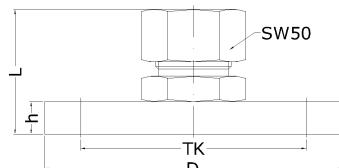

**Accessories (cont.)**

	<b>Description</b>	<b>Article No.</b>
Direction indicator RZ25	for recognition of the direction of flow and insertion depth, adjustable, for probes and probe extensions with Ø 25 mm	HB99-b953
Probe guide piece SFB25 - DN50PN16 for 550 °C as in <b>Drawing 1</b>	for any repeated positioning with marginal excess pressure (max. 2 bar/ 200 kPa) / low pressure, working temperature range -40 ... +550 °C, through hole 25 mm, for connection to flange nipples or ball valves with flange, probe attachment with clamping bush, materials: stainless steel, graphite flange DN50 PN16 in conformity with DIN, installation length L 70 mm	HB04-b110
Probe guide piece SFK25 - G2" with clamping yoke as in <b>Drawing 2</b>	for any repeated positioning even with higher excess pressure (max. 10 bar/1 MPa) / low pressure, through hole 25 mm, for connection to threaded socket or ball valve with inside thread G 2", working temperature range -20 ... +240 °C, installation length 100 mm, materials: stainless steel, VITON®-lip seal, incl. hook spanner and hexagon screwdriver	HB04-b210
Probe guide piece SFB25 - G 1 1/4" with bushing as in <b>Drawing 5</b>	for any repeated positioning with marginal excess pressure (max. 2 bar/ 200 kPa) / low pressure, through hole 25 mm, for connection to threaded socket or ball valve with inside thread G 1 1/4", working temperature range -20 ... +240 °C, installation length 54 mm, materials: stainless steel, VITON®, PTFE clamping bush	HB04-b510
